Technology Made Simple

We design, evaluate and justify technology solutions from a thorough understanding of the business benefit for your company. We handle all aspects of your IT infrastructure including hardware, software management, and any other related technology needs.

It's not about ideas,
It's about making ideas happen.

What we do in a nutshell

MicroAntix has the expertise and resources required to design, develop and manage the highly available and highly secure technology platform that you need, giving you the time and confidence to focus on running your business.

We help strengthen our client's brands by improving how they work. We rethink the process and work together to streamline it, rebuild it, and deliver it back smarter than before.

We empower business to build, innovate and grow through technology.

Our Mission Statement

To provide an array of customer-focused IT solutions, business-class tech support, and low voltage communications services to help our customers improve operational efficiency, while utilizing an ethical, motivated, and productive workforce to deliver complete customer satisfaction. In exchange, we support the communities we serve, provide jobs with growth opportunities, and play a major role in our customers success.

Solving the hardest problems requires the best people. We think that the best people will be drawn to the opportunity to work on the hardest problems. We build our firm around that belief. These two parts of our mission reinforce each other and make our firm strong and enduring.

We're the trusted partner that takes a proactive approach to your technology. We're the fellow small business owner that understand your day-to-day needs.

We're the built-in IT support staff that's always there when you need us.

Latest Work & Case Study

Complete IT Infrastructure & Support

With no technical staff in the business, BrivaDERM teamed up with MicrAntix Networks to manage their technology in 2017. When the organization came on as a client, only a handful of employees had email, and those that did were using personal email accounts for the business. This caused a lot of security, efficiency, and compliance challenges for the organization.

MicroAntix's initial engagement with the client was to deploy a Small Business Server, which included upgrading the medical practice application to a Windows based platform.

Throughout our engagement, MicroAntix has provided Service Desk support and engagement as needed for their headquarters as well as all remote staff.

In working with MicroAntix, the organization was able to make more efficient use of technology in a way that better aligned with their goals.

Structural Network Cabling.

In the height of the Covid-19 pandemic, the BVI government decided to build a Covid Testing Center at the Terrance B. Lettsome Airport and requested MicroAntix for the cabling project.

We installed a rack with several cable drops, termination and patch panels. We then labelled and documented the entire system for completion.

Case Study

Client	Scrub Island Resort, Spa & Marina
Project	IT Service Management
Website	www.scrubisland.com
Date	21st May 2020

Overview

Scrub Island Resort, Spa & Marina, Autograph Collection provides access to modern luxury and natural beauty in the heart of the British Virgin Islands.

MicroAntix took over the management of the organization's technology in 2020 and immediately helped develop a strategic plan to consolidate their system and migrate to new software and unified network systems.

MicroAntix installed fiber optic cabling throughout the entire property along with surveillance systems. We upgraded their phone systems and switches for faster computation.

Veeam was the deployed for redundancy and backup onsite and in the cloud.

The Client was so happy, they requested a long-term service management contract.

We Rethink and Rebuild **Business processes** through effective technology.

As a process transformation company, MicroAntix rethinks and rebuilds processes for the digital age by combining the speed and insight of design thinking with the scale and accuracy of data analytics.

MicroAntix's process transformation services innovate at the intersection of business and technology to transform processes that realize our client's vision. We are experts in accelerating performance and achieving high-impact outcomes through winning execution strategies across the entire business and customer lifecycle.

01.
Increase Profitability

We always start with people. Business is driven by human behavior. And we take a human-centered design approach to drive business results.

02.
Market Leadership

We have been helping customers, across industries from financial services to healthcare, achieve greater agility through transformed and automated customer experiences.

03.
Optimize & Deliver

We deliver anywhere in the world or in the cloud. Our global operation model and employees in 4 different countries allow us to implement best practices and meet clients' needs practically everywhere.

Client Summary

We are proud to
serve our clients

MicroAntix was a lifesaver for a critical setup.
They were able to source and locate hard to find
hardware, get on Island quickly and even give us
his personal hardware because ordering would
take too long! When you absolutely need critical
computer and networking task complete, call
Dwayne at MicroAntix!

Nathan Goggans
IT Manager
Buck Island BVI

MicroAntix were awesome to work with.
They always worked incredibly hard to
meet and exceed our expectations. I could
always count on them to be on time, on
budget and would be there quickly to help
in the event there was an outage. I highly
recommend MicroAntix.
