REVENUE CYCLE MANAGEMENT

NEPractice unifies the business and clinical sides of healthcare by coupling administrative data, such as a patient's name, insurance provider and other personal information, with the treatment a patient receives and their healthcare data.

Focus more on your patient care, because revenue is efficently managed with NEPractice

Communicating with the Health Insurance companies, NEPractice checks for the patient's insurance coverage before providing services to the patient at the care facility. The EMR includes all the administrative and clinical functions that contribute to the capture, management and collection of patient service revenue following international regulations.

INSURANCE

OVERVIEW

NEPractice - INSURANCE is an integrated insurance management system that embodies years of cumulative experience in the design and implementation of automated insurance solutions, tailored for health / medical insurance sector.

Errors are expensive, the further an error travels through the insurance cycle, the more costly recovery becomes. NEPractice Insurance is a powerful module that identifies coding and billing errors as soon as possible and prevent them to the fullest extent possible.

KEY HIGHLIGHTS

- Insurance bill estimation
- Auto tariff calculation
- Split bills on Insurance & Co-Pay
- Single or Batch Claim Submission to TPA
- Tracking Remittance and Rejections
- Resubmission of Rejected Claims
- Age report Analysis
- XML Based claim submission for HAAD and DHA
- Supports CPT, HCPCS, DRG, ICD, LOINIC Codes, etc.
- Audit Logs & much more.

NEPractice - INSURANCE tackles the challanges of declining reimbursment, exessive regulation, and changing payment models that threaten the success and profitability of medical practice.
